Headrest 7.0" 16:9 Color Display Monitor

IR Transmission

TC2

Important Notice

It is unlawful in most jurisdictions for a person to drive a motor vehicle which is equipped with a television or screen that is located in the motor vehicle at any point forward of the back of the driver's seat, or that is visible directly or indirectly to the driver while operating the vehicle.
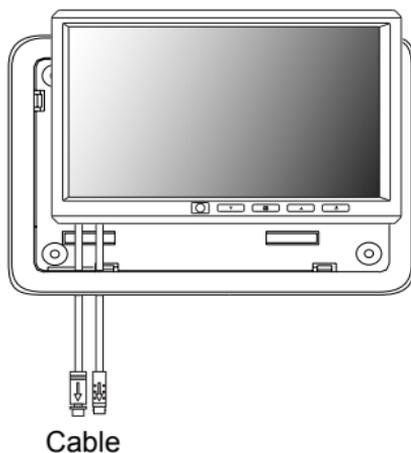

CAUTION

1. Do not expose to direct sunlight for extended periods of time.
2. Do not drop the monitor or expose to strong impacts.
3. Keep the monitor clean and dry.
4. Do not operate the monitor at temperatures below 32°F (0°C) or above 140°F (60°C).
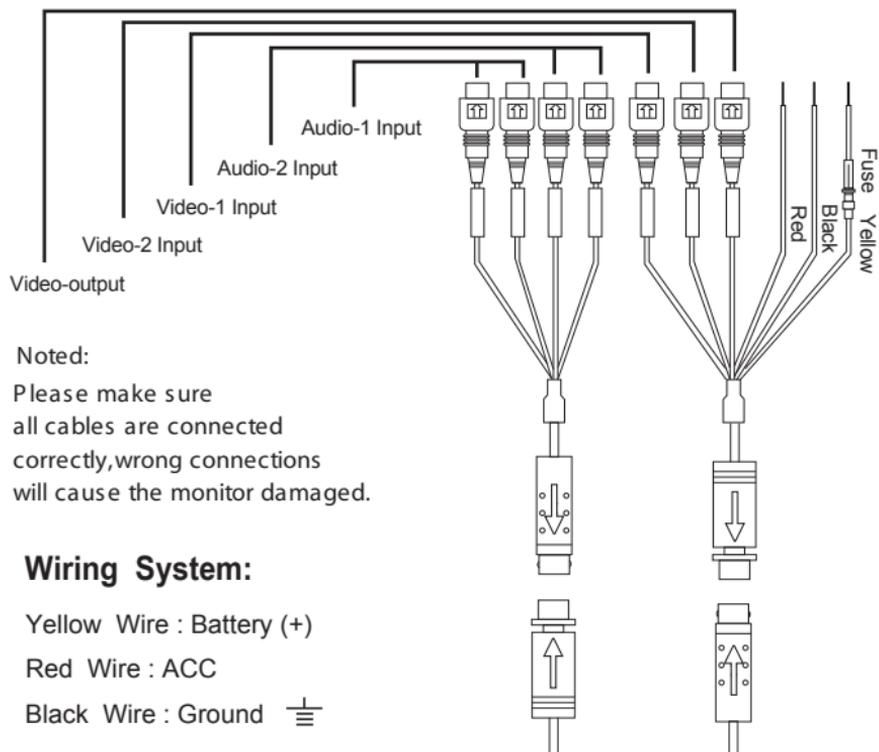

Installation Guide:

The kit includes a protective trim ring and an optional spacer ring for use when the mounting surface is uneven.

1. Select appropriate locations in your vehicle for the monitor and for the power supply module.
2. Be sure there is sufficient depth for the trim ring. Add the spacer ring for shallow locations with uneven curved surfaces such as upholstery. Be sure there is enough space for both the trim ring and for any excess interconnect cable.
3. Ensure that the interconnect cable will reach from the monitor location to the power supply module.
4. Create the required opening for the monitor and trim ring. Be sure it is not too large, and that there is enough space behind the trim ring to store any excess interconnect cable. Excess cable does not fit within the trim ring.
5. Route the cable through the opening in the trim ring
6. Mount the trim ring with the screws provided.
7. Connect the cable to the monitor.
8. Securely snap the monitor into place.

Cable

If you need to remove the monitor from the trim ring, insert the tool provided between the monitor and the trim ring to release the monitor from the flexible locking retainer tabs. Gently pull the monitor from the trim ring. Very gentle pressure can be applied using the tool provided or a credit card.
